

PRESSURE REDUCING VALVES FOR STEAM & INDUSTRIAL FLUIDS BY

spirax sarco

A well designed steam system will produce clean, dry, high pressure steam ready for distribution from the boiler room. Whether the need is to reduce or maintain pressure, proper control at any time demands an automatic valve that can reduce or maintain steam pressure accurately, reliably and economically.

- KEY BENEFITS -

COST SAVINGS

NO ADDITIONAL ENERGY CONSUMPTION NEEDED

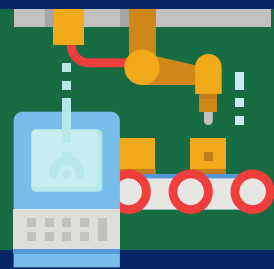

EASY INSTALLATION

REDUCES WEAR & TEAR

REDUCTION IN THE CAPITAL COST OF EQUIPMENT

OPERATING COSTS WILL DECREASE BY REDUCING FLASH STEAM

EASY MAINTENANCE

COMPACT DESIGNS

FLEXIBILITY TO SUPPLY STEAM AT THE OPTIMAL PRESSURE FOR EACH INDIVIDUAL APPLICATION
